

SKYFORM

Scope of Works – Structural Repairs to Concrete Bridges

Client -West Lothian Council

Location - West Lothian

Project Value - £180,000

In September 2012, works commenced to undertake inspection and repair works to concrete highway structure in Livingston and the surrounding area for West Lothian Council. The works included but were not limited to:

- Visual and Percussive Inspections
- Concrete Repairs using High Build Repair Mortar
- Concrete Repairs using Pourable Repair Concrete
- Concrete Repairs to bridge decks using Rapid Set Repair Mortars
- Expansion Joint Replacement
- Bridge Deck Waterproofing / Anti-slip Coatings using Vulkem systems

Works were undertaken in many locations concurrently which presented a challenge logistically, to address this issue a main site compound was erected in the heart of Livingston which was the base for our Site Manager and his team of Charge Hands and repair operatives, storage and welfare facilities were also spread throughout the town to ensure that all Quality and H&S requirements were maintained whilst maintaining a good level of production.

Works are on-going and due to be completed in the autumn of 2013.
